

VOXOX BY TELCENTRIS / UNIFY YOUR BUSINESS.

VOXOX BY **telcentris**®

Telcentris VoIP means productivity and savings.

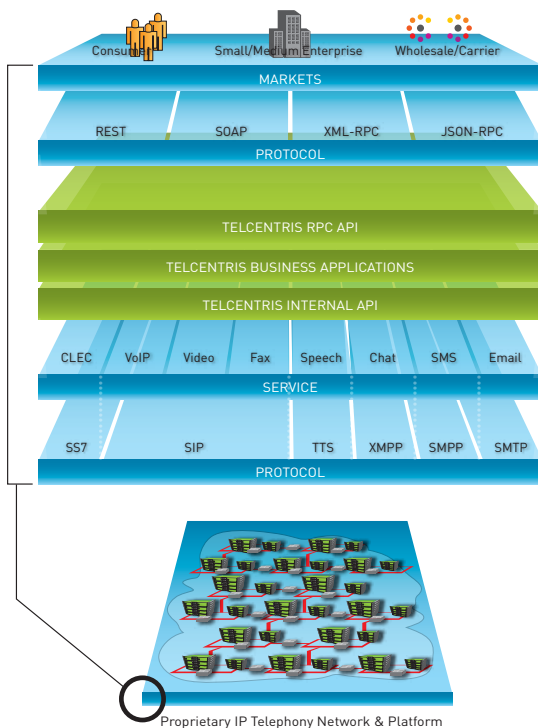

TELCENTRIS, DEVELOPERS OF VOXOX, gives you the most complete, most sophisticated, unified communications solution on the planet, powering the most comprehensive service ever created.

We bring you the future of communications.

We have superlative span: our innovative VoIP solutions span more channels, networks and devices than any other provider. What's more, we offer unrivaled integration. For example, we've introduced the first and only service that integrates all popular communication channels into a single interface.

But that's only the beginning. We have a proprietary unified technology platform with IP telephony solutions that are perfect for any business. That's right. It's the strongest VoIP communications product suite you'll find — at prices you won't believe.

And that means productivity and savings for your business.

Managed communications with one-click control

Founded in 2006, Telcentris is a leader in cloud communication services, innovating easier ways for people to control how they connect across numerous communication networks and devices.

In 2008, Telcentris launched VoxOx, the world's only "Universal Communicator", enabling consumers to unify and manage their communications in one place. VoxOx offers users free peer-to-peer voice and video calls; cheap VoIP calling to landlines and mobiles; intelligent call routing/screening functionality; texting; multi-protocol instant messaging; social network aggregation; faxing; voicemail transcription; large file transfer and even real-time IM and text messaging language translation between approximately 50 languages.

In order to viably offer VoxOx for free to millions of users, Telcentris has engineered and deployed its own proprietary unified communications service delivery platform, which surpasses the feature list of existing platforms and does so without the licensing fees typically charged for comparable solutions. This award-winning platform (**2008, 2009, 2010 Internet Telephony Product of the Year**) is the underlying back-end technology that powers all of our consumer and business divisions.

More and more, VoxOx is becoming the unifying front-end interface of our communications solutions, enabling our customers to amplify the power of our platform in a revolutionary way never before seen in the communications market.

In other words, we're liberating business communications with VoxOx, making it easier, less costly and more efficient to communicate than ever before.

All Telcentris business solutions are available directly from Telcentris and through its

We supercharge your business.

We understand that you have business communication needs. You don't have the time or money to waste on the wrong communication systems. And you don't want to spend a fortune on phone equipment. You need affordable, easy to manage and reliable phone, Internet and fax solutions. That's why at Telcentris we offer the best in class business VoIP solutions for our SMB, carrier and enterprise clients. Everything from one plan for voice and data to fully integrated call center solutions. All utilizing the latest in VoIP technology and phone equipment, including HD Voice.

We help business customers like you choose the right phone, Internet and fax solutions for your unique business needs. Learn how we can help you:

- Pay less for phone and Internet service than with traditional landlines and premise-based phone systems.
- Avoid buying expensive equipment or bring new features to your existing phone system.
- Spend less time trying to become a phone expert. Let us manage your systems for you.
- Never miss another call, have your phone system find you wherever business takes you.
- Have a system that gives your employees and clients a better experience, for increased sales and productivity.
- Experience the new generation of Voice over Internet Protocol (VoIP), including the sounds of HD Voice.

Hosted Business Phone Solutions (Hosted IP-PBX)

Starting @ \$17.99 per person

Telcentris provides hosted VoIP phone services for businesses as an alternative to traditional premise-based phone systems. The advantages of a hosted solution – delivered as a managed service via the web — include dramatically lower upfront costs, reduced monthly fees, instant upgrades, and powerful new features. Telcentris offers a complete end-to-end solution that helps businesses be more productive, stay ahead of technology and lower costs.

SIP Trunks

Starting @ \$9.99 per line

Telcentris offers SIP Trunking and trunk replacement services (SIP, PRI, CAS, Analog) that can provide a cost saving solution for companies, even if they have an investment in traditional premise-based phone system equipment. Telcentris' SIP Trunk offering is a powerful, scalable and highly flexible solution enabling SMBs to streamline costs and resources, and even create emergency fail-over capabilities, all while retaining quality of service standards for business communications.

Data Services

Telcentris VoIP optimized data circuits can be ordered with your VoIP Services, which will prioritize your Voice calls to ensure Quality of Service. The same connection can be used for Data, so it can replace your current T1 or DSL line and save you money.

Hosted Contact Center

Ranging from \$90 to \$125 per seat plus usage

The Hosted Contact Center solution is a feature rich cloud-based call center service for outbound & inbound call centers. Our hosted service includes interactive voice response (IVR), inbound ACD, outbound dialing, call recording and monitoring, CRM integration and many more innovative features that cut costs and boost productivity.

Wholesale Services

Telcentris also offers carrier services solutions, including IP termination, origination and DIDs, toll-free origination, E411 and E911, and SMS solutions. Our wholesale portfolio also includes the opportunity to white label our suite of VoIP products and services under your own brand.

You want more. We can help.

Perhaps your business is moving to a new office building, or opening a brand new location. Maybe you have an old phone system that you spent a fortune on years ago and it is time to either replace it or try to breathe new life into it. Or you are simply looking for a better solution to your communication needs, including call center management. Whatever your reason is for exploring the benefits of a new or upgraded phone system, the Telcentris suite of business services can offer you a customized solution to help you with all your communication needs.

Availability is a phone call or email away.

All Telcentris business solutions are available directly from Telcentris and through its robust channel partner program. Contact us today at **866-612-VOIP (8647)**, or email us at sales@telcentris.com for a free quote to learn more.
